Minimize Risks

Is it a **one-way** or a **two-way** door?

Fail Fast

Amazon once had an auction site called Amazon, which went head-to-head with eBay. Auction shut down eventually, but it helped Amazon launch its own online marketplace for third party vendors called Amazon Marketplace, which is now a big part of its overall business.

Amazon's first smartphone, the Fire Phone, hasn't been discontinued, but it's been a pretty big flop so far. Amazon wrote off \$170 million worth of unsold Fire phones last year, and its hardware division has been cutting jobs recently.

Think Big, Start Small, Iterate Quickly

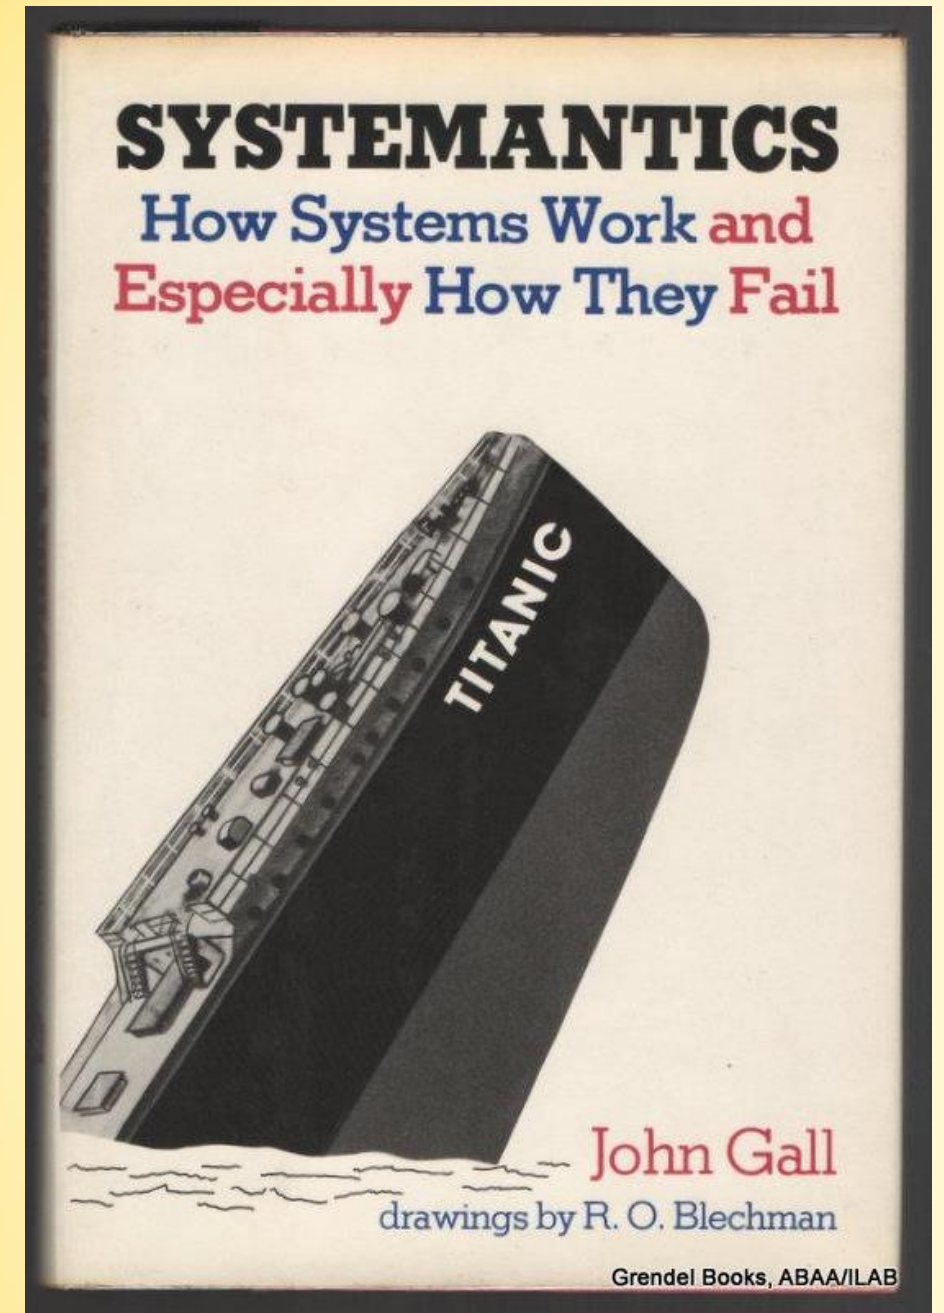

“When wireless is perfectly applied, the whole earth will be converted into a huge brain...”

Nikola Tesla, 1926

“A complex system that works is invariably found to have evolved from a **simple system that worked**. A complex system designed from scratch never works and cannot be patched up to make it work. You have to start over with a working simple system.”

Gall's Law, 1975

“Launch is the starting line, not the finish line...It always takes a lot of **listening** and **iterating** and figuring out what customers want before you have something that's truly successful.”
